Class – XI Holiday Homework
(2025-26)

Holiday Activities (Recommended):

1. Balance your study time with fun and fitness. Go for a walk, play outside, or do simple exercises.
2. Take a metro ride and visit a museum. Keep your ticket stub—you can earn bonus points by showing it to your teacher!
3. Keep a bowl of clean water and some food outside for birds and stray animals.
4. Lend a hand with chores. Surprise your parents with a simple no-flame recipe!
5. Talk to your grandparents, share your holiday fun, and listen to their amazing stories.
6. Plant a seed and take care of it every day. Watch it grow with love and care!
7. Build your awareness of current affairs. Note down new words and their meanings to improve your vocabulary.
8. Maintain a holiday journal—write about your experiences, thoughts, or reflections at least once a week.

SECTION—A: READING SKILLS

I. Read the following passage:

Narration (with the teacher as narrator) leads the students to memorize mechanically the narrated account. Worse yet, it turns them into “containers,” into “receptacles” to be “filled” by the teachers. The more completely she fills the receptacles, the better a teachers

she is. The more meekly the receptacles permit themselves to be filled, the better students they are.

Education thus becomes an act of depositing, in which the students are the depositories and the teacher is the depositor. Instead of communicating, the teacher issues communiques and makes deposits which the students patiently receive, memorize, and repeat. This is the "banking" concept of education, in which the scope of action allowed to the students extends only as far as receiving, filing, and storing the deposits. They do, it is true, have the opportunity to become collectors or cataloguers of the things they store. But in the last analysis, it is the people themselves who are filed away through the lack of creativity, transformation, and knowledge in this (at best) misguided system. For apart from inquiry, apart from the praxis, individuals cannot be truly human. Knowledge emerges only through invention and re-invention, through the restless, impatient continuing, hopeful inquiry human beings pursue in the world, with the world, and with each other.

In the banking concept of education, knowledge is a gift bestowed by those who consider themselves knowledgeable upon those whom they consider to know nothing. Projecting an absolute ignorance onto others, a characteristic of the ideology of oppression, negates education and knowledge as processes of inquiry. The teacher presents himself to his students as their necessary opposite; by considering their ignorance absolute, he justifies his own existence. The students, alienated like the slave in the Hegelian dialectic, accept their ignorance as justifying the teachers existence – but unlike the slave, they never discover that they educate the teacher.

The *raison d'être* of libertarian education, on the other hand, lies in its drive towards reconciliation. Education must begin with the solution of the teacher-student contradiction, by reconciling the poles of the contradiction so that both are simultaneously teachers and students.

This EXCERPT is from: *PEDAGOGY OF THE OPPRESSED* by Paulo Freire. New York: Continuum Books, 1993. Based on your understanding of the passage, answer the questions given below:

1:

In the context of the text, what does the term "narration" refer to?

1. According to the passage, how does the "banking concept of education" view students?
2. The term "praxis" in the text refers to: _____
3. According to the text, what is the consequence of the banking concept of education on students?
 - a) It encourages creativity, transformation, and knowledge.
 - b) It empowers students to challenge the teacher's authority.
 - c) It leads to the development of independent thinking skills.
 - d) It restricts creativity and alienates students from their own learning.
5. According to the text, what is the consequence of the banking concept of education on students?
6. How does the text describe the relationship between the teacher and students in the banking concept of education?

7. What is the main criticism of the banking concept of education in the passage?

8: According to the passage, how does knowledge emerge?

- A) Through memorization and repetition
- b) Through authoritative teaching methods
- c) Through invention, re-invention, and inquiry
- d) Through strict adherence to established facts

9: How does the teacher in the banking concept of education perceive their role?

- A) As a collaborator with the students
- b) As a partner in creative learning
- c) As the source of all knowledge
- d) As a facilitator of critical thinking

10. Find a synonym of the word ‘containers’ from the para 1 of the passage:

- II. Chandrayaan-3, the latest iteration of India’s ambitious mission to the moon, has successfully landed on the lunar surface — making history after its predecessor failed in 2019. The landing, which took place at the targeted time of 5:34 am PT (6:04 pm IST) on Wednesday over a month after the spacecraft’s launch, has made India the fourth nation globally to make a soft landing on the moon, after the former Soviet Union, the U.S. and China, and the first country to land on the lunar south pole, which remains an unexplored area that is anticipated to aid in the understanding of the moon’s atmosphere and pave the way for future space exploration programs. Earlier this month, Russia attempted to take the achievement from India by launching Luna-25, which was due to make a soft landing on the south pole before India’s Chandrayaan-3. However, the Russian spacecraft crashed into the moon on Saturday after losing contact with Roscosmos, the country’s space agency. India’s space agency, the Indian Space Research Organization (ISRO), launched the Chandrayaan-3 spacecraft through its “Launch Vehicle Mark-III” vehicle on July 14. The launch happened from Satish Dhawan Space Centre on South India’s Sriharikota island. “Chandrayaan-3 is a result of the work done by thousands of scientists, engineers, our staff and industries and support teams across ISRO and other places, other institutions,” said ISRO chairman S. Somanath while addressing the audience at the space agency’s mission operation complex in Bengaluru after the successful landing. NASA administrator Bill Nelson also congratulated ISRO on the successful moon landing of Chandrayaan-3 through his post on X, the platform formerly known as Twitter. “We’re glad to be your partner on this mission!” he wrote. Chandrayaan-3, the third version of India’s Chandrayaan mission (“moon vehicle” in Sanskrit), aims to demonstrate safe landing and roving on the moon’s surface and conduct on-site scientific experiments. The spacecraft, developed with a budget of less than \$75 million, comprises a propulsion module, lander and a rover that collectively carry seven scientific instruments.
